## DETAILED ACTION

### *Election/Restrictions*

Applicant's election of Group I, Species II and Su-species A in the reply filed on November 03, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 7, 8 and 10-13 and 17-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 03, 2005.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-6, 9 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the proximal portion" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the distal end" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the distal end" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "the stent" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Finally, the Examiner is not clear if line 12 of claim 3 is properly written. For example, lines 12 and 13 disclose a release mechanism capable of releasing an anchor device from the outer sheath of the delivery system. The Examiner believes that the release mechanism should release the gastrointestinal implant device instead of the anchoring device because the anchoring device is part of the gastrointestinal implant and is not an independent structure.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones et al US Patent 6,428,558 B1.

Jones et al discloses a delivery system comprising a catheter (2) and a spherically shaped element (12) coupled to the distal end of the catheter. The element is remotely releasable (see Figs. 1-6).

Regarding the functional language: "for passage through the intestines". Expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969).

In order to be given patentable weight, a functional recitation must be supported by recitation in the claim of sufficient structure to warrant the presence of the functional language.

*In re Fuller, 1929 C.D. 172; 388 O.G. 279.*

***Allowable Subject Matter***

Claims 3-6, 9 and 14-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***
